SUMMARY

Computer Science senior and AI Lead on an industry-sponsored document intelligence platform, with hands-on experience building RAG and agentic LLM systems end to end: retrieval pipelines, FastAPI services, vector databases, and deployment on GCP and Azure. Available December 2026.

EXPERIENCE

Applied AI Engineer, AI Lead — Woodcrest Capital

Jan 2026 – Present

CrestMind AI, Property Document Intelligence Platform | Industry-Sponsored Capstone | Arlington, TX

- Lead AI engineer on a document intelligence system for natural-language Q&A over leases, inspections, and maintenance records across 363 properties, targeting a 50% reduction in analyst time-to-answer.
- Built an agentic RAG pipeline in LangGraph with hybrid retrieval, combining vector and keyword search fused by Reciprocal Rank Fusion over Supabase and pgvector, and served Llama 3.3 70B on Google Vertex AI.
- Deployed containerized FastAPI services on GCP Cloud Run with a Next.js frontend on Vercel, enforcing citation-grounded prompting rules to minimize hallucination.
- Defined evaluation KPIs with client stakeholders: 90% document classification accuracy and 95% document-to-property association accuracy, measured on an end-to-end benchmark suite.

PROJECTS

ElevateU — AI Job Search and Auto-Apply Platform

Feb 2026 – Present

Python, LangChain, LangGraph, FastAPI, Streamlit, Supabase (pgvector), Playwright | elevateuapp.org

- Building a full-stack job platform for F-1/OPT students that joins 500K+ Department of Labor LCA sponsorship records with live ATS board data from Greenhouse, Lever, and Ashby to surface sponsorship-likely roles.
- Implemented a RAG career-coaching agent on pgvector with resume optimization, ATS scoring, OPT timeline tracking, and hybrid regex plus LLM sponsorship detection.
- Developing a Playwright auto-apply module with a fill-and-hand-back design that pre-populates Greenhouse and Lever applications, leaving final submission to the user.

MediCall — AI Patient Voice Agent

Feb 2026

Python, Twilio, ElevenLabs, GPT-4o | Technical Assessment for AI Company CEO

- Built an autonomous voice agent simulating a patient calling a medical receptionist, integrating Twilio telephony, ElevenLabs speech synthesis, and GPT-4o; passed all test scenarios.
- Identified 3 critical vulnerabilities in the target system: exposed patient PII (HIPAA violation), a hardcoded name in production, and LLM hallucination, documented in an assessment report.

Aviation Safety Analytics Platform

Jul 2025 – Oct 2025

Azure Data Factory, Azure Blob Storage, Azure SQL Database, Power BI, Python

- Built a cloud ETL platform on Azure ingesting 38,000+ NTSB and Aviation Safety Network accident records, with analytics-ready relational schemas and 3 interactive Power BI dashboards for trend analysis.

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, JavaScript

AI and Machine Learning: RAG, LLM Applications, Agentic AI, LangChain, LangGraph, Prompt Engineering, Embeddings, Vector Search, Hybrid Retrieval, LLM Evaluation, GPT-4o, Llama 3.3

Backend and Data: FastAPI, REST APIs, PostgreSQL, Supabase, pgvector, ChromaDB, ETL Pipelines, Apache Spark, Databricks

Cloud and DevOps: GCP (Cloud Run, Vertex AI), Azure (Data Factory, Blob Storage, SQL Database), Docker, Git and GitHub, Vercel

Other Tools: Streamlit, Next.js, Power BI, Twilio, ElevenLabs, Whisper, OpenCV, Playwright, Jupyter

EDUCATION

University of North Texas, Denton, TX — B.S. Computer Science | GPA: 3.67 / 4.0

Jan 2024 – Dec 2026

Dallas College, Dallas, TX — Associate of Science | Phi Theta Kappa Honor Society

Aug 2022 – Dec 2024

CERTIFICATIONS AND INVOLVEMENT

Databricks Certified Data Engineer Associate | IBM Python for Data Science and AI | BCG X GenAI Job Simulation | UNT Computer Science Club
